Group briefed on lake’s quality

From Hamilton News
Published 09:41 27/11/2015

Presenting at the briefing, Waikato University student Carl Hartley outlined three possible methods of cleaning waikato lake water, which included reticulation systems to actively treat the water, artificial wetlands which would treat water through natural filtration and lake bed dredging to remove heavy metals and contaminates. Waikato University professor of biological sciences Brendan Hicks presented figures collected since 1992 which he said showed that lake clarity had been steadily increasing and a reduction in the amount algae in the water - both positive signs, however Streamlined Environmental water resources scientist Dr Tim Cox questioned these finding, saying they may have been skewed by changes in sampling schedules over the year.

$23m in projects planned for CBD

From Bay of Plenty Times
Published 10:45 01/09/2015

Tauranga’s CBD has received “a shot in the arm” with more than $23 million worth of building consents in the year to June 30 - up 212 per cent from the previous 12 months - and business leaders say it is “evolving into a commercial hub”. ... Commercial real estate agents also report renewed interest in downtown Tauranga with several high-profile buildings sold over recent weeks as investors take advantage of low-interest rates and high yields. ... Figures supplied by Priority One show $23.6 million in building consents were issued by Tauranga City Council for developments in the city centre, a 212 per cent increase on 2013/14 when $7.6 million of consents were granted.

Campus project manager named

From SunLive
